

# VEGETABLE PLANTING COMPANIONS

Vegetables grow better when they are with other vegetables. Certain vegetables help repel bugs that could kill another plant, or the nutrients one plant provides the soil can help another grow fuller and more flavorful. But the opposite is also true. Some plants will weaken or could not survive in the company of their foe. Reference this list when planning your vegetable garden.

Plant Friends			Plant Foes
	Beans	Broccoli, carrots, cauliflower, corn, cucumbers, peas, strawberries, chard, tomatoes, cabbage, eggplant, lettuce	Onions, garlic, chives, peppers
	Broccoli	Beans, carrots, chives, cucumbers, dill, garlic, oregano*, lettuce, onions, rosemary, sage, spinach, chard, thyme	Peppers, squash, strawberries, tomatoes, cabbage, eggplant
